Exposure Controls / Personal Protection

WORKPLACE EXPOSURE STANDARDS (provided for guidance only)

	TWA		STEL	
Substance	ppm	mg/m³	ppm	mg/m³
tert-Butyl acetate	200	950		

Workplace Exposure Standard - Time Weighted Average (WES-TWA). The time-weighted average exposure standard designed to protect the worker from the effects of long-term exposure. Workplace Exposure Standard - Short-Term Exposure Limit (WESSTEL). The 15minute average exposure standard. Applies to any 15- Minute period in the working day and is designed to protect the worker against adverse effects of irritation, chronic or irreversible tissue change, or narcosis that may increase the likelihood of accidents. The WES-STEL is not an alternative to the WES-TWA; both the short-term and time-weighted average exposures apply. Workplace Exposure Standards and Biological Exposure Indices NOV 2017 9TH EDITION.

Engineering Controls:

None required when handling small quantities. Handle in accordance with good industrial hygiene and safety practice. Wash hands before breaks and at the end of the workday.

Personal Protection Equipment

Respiratory	Avoid generating and breathing mist and vapour. If applicable to use an air-purifying respirator approved by government standards NIOSH (US) or CEN (EU).
Hands	Wear protective gloves. Nitrile gloves are recommended. Inspect gloves prior to use and ensure proper glove removal technique to avoid skin contact with contaminated surfaces. Dispose of contaminated gloves according to local laws and good workplace practices.
Eyes	Safety glasses with side shields; or as required. Chemical goggles. Contact lenses pose a special hazard; soft lenses may absorb irritants and all lenses concentrate them.
Skin	Impervious protective clothing for small quantities. Consider wearing flame retardant antistatic protective equipment if working with larger quantities. Wear safety footwear.
